OUR HISTORY

Citizens For Ponce Inlet was organized around 1980 when a small group of residents formed a citizens committee to work with the Town Council to find a way to create an affordable municipal sewer service. The Town Council enthusiastically welcomed help from our group and the Citizens For Ponce Inlet came into being.

**OUR MISSION
EDUCATE & PRESERVE**

We are an all volunteer citizen organization that studies, conducts research, investigates and recommends programs affecting the quality of life in Ponce Inlet. We are concerned with protecting the environment and those environmental conditions which maintain property values. We will take appropriate action relative to land use, zoning and preserving our scenic areas.

WE ARE INDEPENDENT AND NON-PARTISAN

- We will strive to work with our Town Government to find solutions to the challenges of growth and development. Our decisions will stem from careful research and will be data-driven and fact based.
- We will survey our Membership for their views on important issues and share that information with Town government.

- We select, honor and acknowledge a "Citizen of the Year" who has made an outstanding volunteer contribution to the Community.
- We honor citizens who have served the Community for over 20 years with a "Lifetime Achievement Award."
- We hold Town Forums to give community members insight on our candidates and their policy positions.
- We publish a Quarterly Newsletter with the Town showcasing important issues, information and activities. Digital Newsletters are available to all citizens on our website www.C4PI.org.

Ponce Inlet Community Center

Over the years, CFPI has been helpful in saving the Town money and has been influential in many important town decisions and positive changes. In 1987 this group helped raise money to build the Ponce Inlet Community Center.

Ponce Inlet is a small town at the southern-most point of a barrier island. Home of the tallest Lighthouse in Florida, it was originally named Pons Park in the middle 1880's by Brigadier General Orville Babcock the engineer appointed to build the Lighthouse. The town was incorporated on August 20, 1963.
